Chapter 1

2 Introduction

This document illustrates the format to be used for dissertations at FEUP. Examples of margins
4 are given, headings, titles, pagination, index styles, etc. are given. It also gives examples of
formatting citations, figures and tables, equations, cross-references, reference lists and indexes.
6 This document is not intended to exemplify content to be used.

This first chapter illustrates the use of citations and references.

8 1.1 Section Example

As well as giving an example of how to use a quotation, the following paragraph introduces a
10 reference that can be consulted, among many other interesting bibliographical references (Tham
2001; Philips et al. 2005).

12 “Like the Abstract, the Introduction should be written to engage the interest of the
reader. It should also give the reader an idea of how the dissertation is structured, and
14 in doing so, define the thread of the contents.” (Tham 2001, chap. Introduction)

Always use the `siunitx` package to write values, units, etc. according to the International System of Units convention rules and style conventions (see <https://physics.nist.gov/cuu/Units/checklist.html>).

For example: 50 kg, 15 °C, 20.01 m s⁻¹, 120 kB s⁻¹, 34 %, 289 300.00 €, 10245.450234.

Table 3.2 serves to exemplify the alignment in the columns with numbers, and has nothing to do with any numerical data associated with FEUP’s resources and investments in 2025.

3.2.4 Subsection Example — Acronyms

- 4 This section shows how to use the acronyms Artificial Intelligence (**AI**) and Machine Learning (**ML**). Later we can simply refer to **AI** or **ML** without expansion.
- 6 In modern technology, Natural Language Processing (**NLP**) plays a crucial role in virtual assistants and chatbots. We also rely on Graphics Processing Unit (**GPU**) hardware for deep learning
8 models.

3.2.4.1 Special use in titles as **FEUP**

- 10 Acronyms can also be made plural: **GPUs** are widely used in high-performance computing. Possessive forms are supported too: **AI**'s impact on society is profound at Faculdade de Engenharia
12 da Universidade do Porto (**FEUP**).

Appendix A

² **Lorem Ipsum**

After the conclusions and bibliographical references, the text used to complete the dissertation is
⁴ presented in this numbered annex.

A.1 What is *Lorem Ipsum*?

⁶ ***Lorem Ipsum*** is simply dummy text of the printing and typesetting industry. *Lorem Ipsum* has
⁸ been the industry's standard dummy text ever since the 1500s, when an unknown printer took
¹⁰ a galley of type and scrambled it to make a type specimen book. It has survived not only five
¹² centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was
popularised in the 1960s with the release of Letraset sheets containing *Lorem Ipsum* passages,
and more recently with desktop publishing software like Aldus PageMaker including versions of
¹² *Lorem Ipsum* Lipsum [n.d.].

A.2 Where does *Lorem* come from?

¹⁴ Contrary to popular belief, *Lorem Ipsum* is not simply random text. It has roots in a piece of
¹⁶ classical Latin literature from 45 BC, making it over 2000 years old. Richard McClintonck, a Latin
¹⁸ professor at Hampden-Sydney College in Virginia, looked up one of the more obscure Latin words,
²⁰ *consecetur*, from a *Lorem Ipsum* passage, and going through the cites of the word in classical
literature, discovered the undoubtable source. *Lorem Ipsum* comes from sections 1.10.32 and
1.10.33 of “*de Finibus Bonorum et Malorum*” (The Extremes of Good and Evil) by Cicero, written
in 45 BC. This book is a treatise on the theory of ethics, very popular during the Renaissance. The
first line of *Lorem Ipsum*, “*Lorem ipsum dolor sit amet...*”, comes from a line in section 1.10.32.
²² The standard chunk of *Lorem Ipsum* used since the 1500s is reproduced below for those interested.
²⁴ Sections 1.10.32 and 1.10.33 from “*de Finibus Bonorum et Malorum*” by Cicero are also
reproduced in their exact original form, accompanied by English versions from the 1914 translation
by H. Rackham.

A.3 Why is *Lorem* used?

- 2 It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using *Lorem Ipsum* is that it has a more-or-less normal
- 4 distribution of letters, as opposed to using “Content here, content here”, making it look like readable English. Many desktop publishing packages and web page editors now use *Lorem Ipsum*
- 6 as their default model text, and a search for “ *lorem ipsum* ” will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on
- 8 purpose (injected humour and the like).

A.4 Where can you find examples?

- 10 There are many variations of passages of *Lorem Ipsum* available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don’t look even slightly
- 12 believable. If you are going to use a passage of *Lorem Ipsum* , you need to be sure there isn’t anything embarrassing hidden in the middle of text. All the *Lorem Ipsum* generators on the Internet
- 14 tend to repeat predefined chunks as necessary, making this the first true generator on the Internet. It uses a dictionary of over 200 Latin words, combined with a handful of model sentence structures,
- 16 to generate *Lorem Ipsum* which looks reasonable. The generated *Lorem Ipsum* is therefore always free from repetition, injected humour, or non-characteristic words etc.
